

# SafeMetrics

## Capabilities – Why choose SafeMetrics, LLC?

*Many companies offer similar EHS&S consulting services, but to execute them well in a competitive environment requires elite technical knowledge, an astute understanding of the local markets and a compassion for the client--*

### Company History

SafeMetrics, LLC began in 2006 as a provider of environmental, health, safety and sustainability services (EHS&S). We are based locally in Noblesville, Indiana and service construction, manufacturing, insurance, and biotech companies in the greater Midwest.

### Purpose

SafeMetrics, LLC was built on the concept that to create change, outcomes should be measured. EHS&S performance differs from measuring outputs such as production or quality. EHS&S success is determined by the absence of an outcome (injuries, waste generated or violations) rather than its presence. To meet our clients' goals, outcomes relating to safe behaviors or conditions that avoid or mitigate losses are established and measured. SafeMetrics, LLC uses the concept of "measuring to affect change" as the basis for all projects.

### WBE-Certified Company (WBE)

Diversity requirements are becoming more common in today's business environment. Our certification as a Woman-Owned Business Enterprise (WBE) can assist Construction managers, Subcontractors and public entities in satisfying their bid or diversity requirements. Our certification covers a variety of UNSPSC codes.

### Capabilities

SafeMetrics, LLC provides a variety of services that allow their clients to achieve compliance with regulatory standards or with internal or external goals. Common services include:

- Onsite compliance training for OSHA, EPA or LEED programs;
- New hire orientation training;
- Temporary onsite staffing support;
- Industrial hygiene monitoring;
- Risk and hazard assessments;
- Systems development such as VPP, EMS, OHSAS, ANSI Z10;
- Contractor pre-qualification systems.

Don't see your desired service? Our value lies in customizing our knowledge and experience to meet your everyday EHS&S directives. Let us know how our team of experienced and credentialed staff can assist in executing and monitoring your goals.
